

Order Status and Capture Status

Order Status [↗](#)

Order Status	Description
pending	The order has been created but has not yet been authorized by the customer. If no action is taken by either the customer or the merchant, it will remain in this status for a default period of 20 minutes.
expired	The order is expired and the customer never authorized it.
refunded_not_charged	The order is expired but the customer authorized it. No capture has been called.
charged	The order has correctly been captured.
partially_refunded	The order has been refunded for a partial amount of the original amount .
refunded	The order has been completely refunded for the total original amount of the order.

Capture status [↗](#)

Capture status	Description
pending	The order has not been captured
captured	The order has correctly been captured
delayed	The capture has been delayed. Default value of the delay is 5 days.
voided	The order has been voided from the merchant before the capture.
